GUTTER SERVICE

SINCE
1976

THE
ORIGINAL
GUTTER
GUYS!

Protect and beautify your home with a Maintenance-Free, **Color-Coordinated** Rain Carrying System from All New Gutter Service.

At All New Gutter Service, we specialize in seamless rain carrying systems. We have been the local leader since 1976, and are the Original Gutter Guys! Our system is designed to work as a complete protection and beautification package for all new home construction, existing remodeling projects or commercial properties. The wonders of nature are truly amazing...but they can also be hard on your home. Eaves, overhangs, porch ceilings and fascia – often the least noticed areas of your home's exterior – can blister, peel or rot. Suddenly you're faced with a costly maintenance problem that affects your home's value and appearance.

≡ **Why Your Home Needs a Gutter System**

Protects: roofs, foundations and landscaping

Prevents: wood rot, mold, mildew, pest infestation, soil erosion and water saturation

Our goal at All New Gutter Service is to provide all of our customers with the most superior-functioning, best-looking low-maintenance seamless gutter systems. Our reputation depends on it! Happy customers keep us busy, and that is why we have been serving the community for over 40 years.

≡ **Why Choose All New Gutter Service**

All New Gutter Service is the only seamless gutter company in the area that offers one warranty that covers both materials and workmanship. Our limited lifetime warranty also includes 25 years of limited chalk and color change protection with our superior coating. We stand behind the products we sell.

≡ Why Have Gutters

Your home is your largest investment.

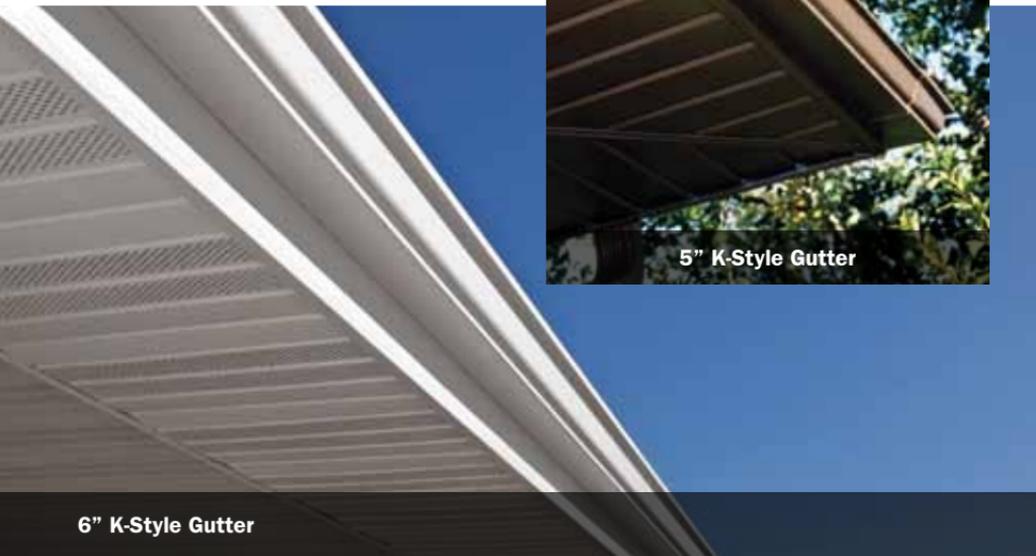

Protect it against its biggest threat – water!

- 1) Painted surfaces can wear significantly faster when wet, causing peeling, chipping and potential rotting sooner than normal.
- 2) Water by your foundation can eat away at the lime in cement and eventually crack the cement. This leads to flooded basements.
- 3) Water by a cement pad can undermine the pad and cause frost heaves that can crack the pad.
- 4) Water can undermine stone walls, walkways or stonework.
- 5) Splashing water around your home can not only dirty your home's exterior, but it may also cause rot. This leads to replacing door jambs, window sills, wood siding, decking, etc.
- 6) Splashing water can ruin any plants and landscape by the home.

All of these water problems can be solved by controlling the rainwater with an All New Gutter seamless gutter system. Our rain carrying systems will protect you from the many costly repairs that water can cause to your home, and give your roof line that finishing touch.

≡ Why Gutter Protection

A well-functioning gutter system is your home's best protection against water damage, which can cause rot, mold, mildew, pest infestation and more. All New Gutter Service offers two options for protecting your home by protecting your gutters, ensuring they can do their job!

≡ Complete Gutter Protection | Leafaway®

Enjoy your home without the dangerous task of cleaning your clogged gutters. Leafaway's one-piece, seamless design allows rainwater to flow into the gutter trough while deflecting wind-blown debris such as leaves, pine cones and twigs, which are often collected in conventional gutters.

- **Seamless gutter protection**
- **Multiple color options**
- **Custom manufactured on-site**
- **Worry-free system**
- **No roof attachments**

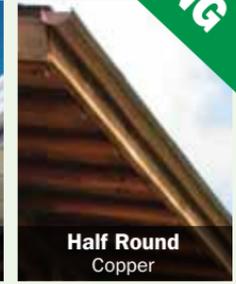

≡ Add-On Covers | Gutter Gekko & E-Z Flow

Looking for an add-on gutter cover system? All New Gutter Service offers Gutter Gekko and E-Z Flow gutter add-on systems. These gutter add-ons work with all types of roofs and creates a defensive barricade that keeps out debris, leaves, animal nests, pine needles and grit. They are available in 5" and 6" widths and are added to your existing gutter troughs.

SELLING**

≡ Styles & Profiles

We offer a variety of gutter systems. Most popular are our 5" and 6" gutter systems. The .032" thick aluminum is the thickest aluminum seamless gutter available. With over 30 standard colors and endless custom color options, we are sure to have the perfect choice for you. Whether you want your gutters to match or contrast your siding, we can help you create an attractive look for your home. We also install fascia gutter, half-round gutter, soffit and fascia.

Our gutter systems are installed using hidden gutter hangers designed to provide greater support and a cleaner, seamless look. By securing the gutters with 1.5" screws, the chance of saggy, leaky gutters is greatly diminished.

≡ The All New Gutter Difference

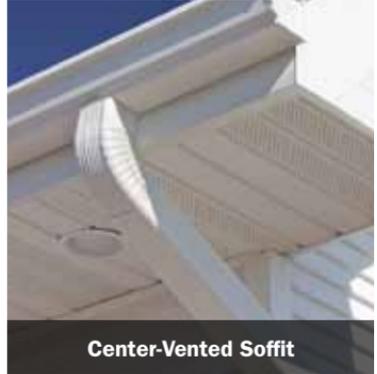

Our reputation is everything. We won't compromise the quality of our materials to save a few dollars. We would rather lose the job than hurt our reputation. We use the thickest seamless gutters available with the strongest hardware to hang them. The experience of our installers is just as important as the materials we use. Every installer has had extensive training. This training teaches them how to install the gutter system at perfect angles for the best water flow and maximum efficiency. All New Gutter does not let any installer run a job until they are 100% proficient in our installation methods.

☰ Soffit, Fascia & Downspouts

Maintaining your property's eaves and overhangs can be quite a chore – that's why All New Gutter Service offers maintenance-free soffit and fascia.

Soffit and fascia are the final decorative touches that create a fine, classic finish to a home's exterior. They cover all existing overhangs and roof edges, smoothing the overall appearance and protecting your home. Improperly installed soffit and fascia systems can cause moisture and rotting problems in the roof's structure.

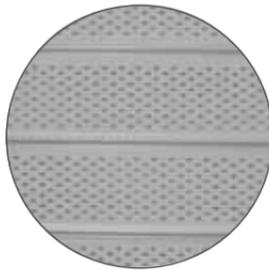

All New Gutter offers a variety of soffit panels, including multiple vented styles that promote continuous airflow, which is a necessary component to keeping your attic cool and dry. Our panels work to optimize the home's breathability and ultimately reduce energy costs. Available in a wide array of colors, you are able to perfectly complement your siding colors for an attractive, maintenance-free look.

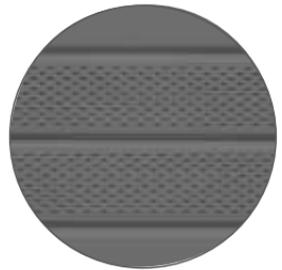

Types of Soffit Panels:

Solid Soffit Panel
Use in unventilated areas

Full-Vented Soffit Panel
Provides continuous airflow

Center-Vented Soffit Panel
Optimal ventilation

Maximize Drainage, Minimize Problems

Highly functional rain carrying systems must be durable, attractive and able to handle water flow capacity. The Superspout™ effectively controls water as it is drawn away from your home and your foundation. Unlike ordinary downspouts, the water is swirled, like a cyclone, which allows debris in your gutters and downspouts to be more easily removed. This greatly reduces clogging in the downspout and increases water flow.

For commercial applications, All New Gutter Service offers a 4" x 5" downspout and elbow available with our 6" gutter trough.

≡ We Are Fully Insured

All of our installers are All New Gutter Service employees with full workman's compensation. No subcontractors! We are licensed, insured and bonded in North Dakota, South Dakota and Minnesota.

≡ What To Expect

An All New Gutter specialist will start by coming to your home and evaluating any water issues you may have. With your input, they will recommend the best course of action to protect your home.

- Recommendations are made on how to control the roof water.
- We will work with you on selecting the best style for your home. Style refers to the profile of the gutter and downspouts.
- With a variety of colors and infinite custom colors, we will recommend a custom system that will look as good as it works.

Once all the decisions are made, one of our highly-trained installation specialists will come to install your new seamless gutter system.

- Gutters are manufactured on-site with our seamless machines.
- Gutters are cut to the exact length and are installed on your home with the proper angles to guarantee proper water flow.
- A typical installation will be completed in just one day.

≡ Cleaning & Repairs

Did you know that proper maintenance can help extend the life of your gutter system? All New Gutter Service not only repairs gutters, but we also offer gutter cleaning!

We will professionally clean your gutters, and if we find any damage to your gutters, we can repair it for you. When All New Gutter Service is done, your home will look as good as new!
